1. Introduction

1.1 About EPIC.submit

EPIC.submit is an online application that allows Certificate/Exemption Holders to submit management plans and other post-certificate documents to the Environmental Assessment Office (EAO). The system streamlines the submission process, tracks document versions, and facilitates communication between users and the EAO.

1.2 Who Should Use This Guide

- **Certificate/Exemption Holders:** organizations that need to submit management plans and other documents to the EAO. EAO staff have their own guide. This guide covers Management Plan and IEM submissions as EPIC.submit works today.

1.3 Key Benefits

- **Status Tracking:** Monitor the progress of your submissions
- **Version Control:** Keep track of document versions
- **Team Collaboration:** Work with team members on submissions

2. Getting Started

2.1 System Requirements

To use EPIC.submit, you need:

- **Login Credentials:** A BC Services Card or Business BCeID
- **Email Address:** A valid email address to receive notifications

Accepted File Formats for Consultation Records and Management Plan/IEM documents:

- PDF
- Word documents (.doc, .docx)
- Excel files (.xls, .xlsx)

NOTE: Max file size is 500 MB

2.2 First-Time Login Process

Follow these steps the first time anyone in your organization uses EPIC.submit, when your organization does not yet have an account.

1. Receive an account setup link via email from the EAO
2. Click the link in the email (note: this link can only be used once)
3. The link expires 7 days after the EAO generates it. If yours has expired, contact the EAO and ask them to renew it

4. Select your login method:

- **BC Services Card**
- **Business BCeID**

The image shows two login options presented as cards. The top card is titled 'Login with your Business BCeID' and contains the text: 'For more information on registering for a Business BCeID, visit <https://www.bceid.ca/register>'. Below the text is a dark blue button with the text 'Login with Business BCeID'. The bottom card is titled 'Login with your BC Services Card account' and contains the text: 'For more information on how to use or set up a BC Services Card account, visit www.id.gov.bc.ca'. Below the text is a dark blue button with the text 'Login with BC Services Card'.

5. Enter your credentials for the selected login method
6. You will be directed to the Contact Information screen

NOTE: Completing this first-time setup makes you the Regulated Party Account Administrator for your organization's account. You can then invite Project Administrators and Collaborators from the User Management page.

NOTE: If your organization already has an EPIC.submit account and a new project has become eligible, you will not receive a setup link. The EAO enables the new project in EPIC.submit and can tell you who your Regulated Party Account Administrator is. That administrator gives you access to the project, either by inviting you or by assigning you a role from User Management, as another Regulated Party Account Administrator or as a Project Administrator. See section 4, User Management.

2.3 Subsequent Logins

1. Go directly to <http://www.submit.eao.gov.bc.ca>
2. Click the **Login** button in the top right corner
3. Select your login method (BC Services Card or Business BCeID)
4. Enter your credentials

2.4 Setting Up Your Contact Information

When logging in for the first time, you will need to set up your contact information:

1. Enter your Given Name and Surname
2. Enter your position or role at your company
3. Enter your phone number and work email address
4. Read the Account Terms and Conditions and accept them. The **I Agree to the Terms and Conditions** button stays unavailable until you have accepted the terms inside the pop-up.
5. Click the **Save** button

NOTE: The remaining steps apply only if you are the first person setting up your organization's account. If you were invited by someone who already has access, saving this form takes you to the Projects page and your set-up is complete. See 2.5.

 **EAO** Environmental Assessment Office

EPIC.submit

FortisBC

First, create your account.

Welcome to EPIC.submit.

Please create your account as a Regulated Party Account Administrator for FortisBC.

Regulated Party Account Administrators have full access to every project associated with the account, can create and submit packages to the EAO, and can manage all users.

Your Contact Information

Your Given Name

Your Surname

Your Company Name

Your Position/Role

Your Work Phone Number

Ext.

Your Work Email Address

☐ I agree to the [Terms and Conditions](#)

6. You will be directed to the Project Account page where you can verify your project
7. Click **Confirm** if the project information is correct

8. If the project information is incorrect, click **No, this is incorrect** and contact the EAO at eao.managementplansupport@gov.bc.ca
9. After confirming, you will see a success message indicating your account has been set up as the Regulated Party Account Administrator
10. Access the home page or the user management page to add other people to the project account

2.5 Joining an Account by Invitation

If someone at your organization invited you to an account that already exists, your set-up is shorter than the first-time set-up above.

Select the link in your invitation email, sign in with your BC Services Card or Business BCeID, then fill in your contact information and accept the Account Terms and Conditions. When you save the form you go straight to the Projects page, with the role you were invited into already assigned. You do not confirm the project information: only the person who first set up the account does that.

2.6 Accessing the User Guide

To access the most recent User Guide, go to the home (login) page of EPIC.submit and click the link at the bottom right.

Getting Started with EPIC.submit

To begin using EPIC.submit, certificate holders will receive a login link and access instructions from the EAO. The intuitive interface guides users through the submission process, allowing for efficient document uploading, form completion, and submission tracking.

For assistance with EPIC.submit, please contact the EAO support team at EAO.EPICsystem@gov.bc.ca.

[Download the EPIC.submit User Guide v2.0](#)

3. Understanding User Roles

EPIC.submit has three user roles. Two of those roles have access-level options:

3.1 Regulated Party Account Administrator

As a Regulated Party Account Administrator, you have account-level access across every project in your organization's account. You can:

- Access all projects and submissions in the account
- Create new submissions
- Submit documents to the EAO

- Manage users across all projects, including assigning Project Administrators and adding Collaborators to all or specific submissions
- Assign the Regulated Party Account Administrator role to other users (only this role can assign it)
- Manage every project on the account, including adding new users to any of them

3.2 Project Administrator

As a Project Administrator, you can:

- Access all projects on the account, or only the specific projects you are assigned to
- Create new submissions
- Submit documents to the EAO
- Manage users within the projects you are assigned to
- Add other users to the system
- You cannot assign the Regulated Party Account Administrator role

3.3 Collaborator for All Submissions

As a Collaborator for All Submissions, you can:

- Access all existing submissions to view and contribute
- Upload documents and fill out forms
- You cannot submit to the EAO
- You cannot manage users
- You cannot access the Documents page

3.4 Collaborator for Specific Submissions

As a Collaborator for Specific Submissions, you can:

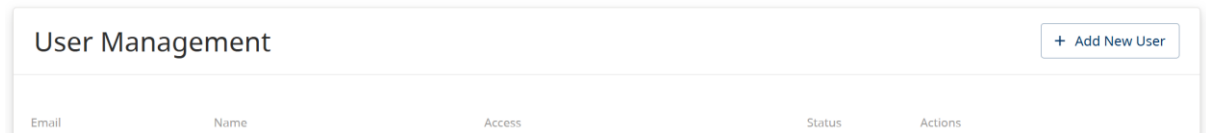

- Access only the submissions assigned to you
NOTE: *a submission must be created first in order to assign a Collaborator to it.*
- View and contribute to those selected submissions
- You cannot submit to the EAO
- You cannot manage users
- You cannot access the Documents page

4. User Management

NOTE: *Only Regulated Party Account Administrators and Project Administrators can add and manage users.*

4.1 Adding New Users

1. Navigate to the User Management page by clicking **User Management** in the left navigation menu
2. Click the **Add New User** button in the top right corner

3. Enter the email address of the user you want to add
4. Or select an existing user from the dropdown list of people already on the account

A screenshot of the 'Add New User' form, which is a modal window titled 'User Management'. The form is divided into two main sections. The first section, 'Add New User', contains a text input field for the user's email address, with a note stating 'Enter the new user's email address. The user will receive an email invitation to join your project.' The second section, 'Assign Application Access', asks 'What permissions should this user have?' and lists five radio button options: 'Regulated Party Account Administrator', 'Project Administrator - All Projects', 'Project Administrator - Specific Project(s)', 'Collaborator - All Submissions', and 'Collaborator - Specific Submissions'. At the bottom of the form are two buttons: 'Add User' and 'Cancel'.

5. Select the appropriate access level:
 - **Regulated Party Account Administrator**
 - **Project Administrator (all projects, or specific projects)**
 - **Collaborator for All Submissions**
 - **Collaborator for Specific Submissions**

NOTE: The *Regulated Party Account Administrator* option appears only if you hold that role yourself. Project Administrators do not see it.

6. If selecting "Collaborator for Specific Submissions," choose the specific submissions from the dropdown menu

NOTE: Submissions must be created before they can be assigned to a user

7. Click **Add User**
8. The system will send an invitation email to the user

9. If the email address already belongs to an active user, a User Already Exists message appears. Edit that person's access instead of sending a second invitation.

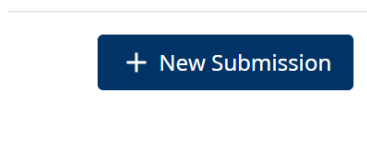

4.2 Managing Existing Users

1. Navigate to the User Management page
2. View the list of users in the user management table
3. Check the status of users:
 - **Invited:** User has been invited but has not yet accessed the system
 - **Active:** User has accessed the system and entered their contact information
 - **Revoked:** The user's access has been removed
4. To resend an invitation email, click the resend link in the management section
5. To remove someone, open their profile and revoke their access. Revoking takes effect immediately: the person loses access straight away and any session they have open ends at once.
6. To bring a revoked user back, reactivate them from the User Management page and reassign their roles. Do not send them a new invitation.
7. To cancel an invitation that has not been used yet, revoke it. This disables the invitation link and frees the email address so it can be invited again.
8. To view a user's profile, click the **View Profile** link
9. In the user profile, you can:
 - See their role
 - View assigned projects (for collaborators with specific project access)
 - Reassign user roles
 - Reassign to different projects

5. Creating and Managing Submissions

5.1 Creating a New Submission

1. Navigate to the All Projects page
2. Click the **New Submission** button

3. Select the condition for which you are submitting documents from the dropdown menu

Management Plans & Related Documents

Post-Decision

New Submission

Create New Submission

What condition is this submission for?

Please note: you can only submit one management plan per condition.

Condition 9 - Independent Environmental Monitor

Condition 16 - Community Effects Management Plan

Condition 17 - Health and Medical Services Plan

Condition 18 - Drinking Water and Water Treatment Plan

Condition 19 - Human Health Monitoring and Management Plan

NOTE: You can only submit one management plan per submission

4. If applicable, list any supporting conditions that might interact with your submission

- Williams Lake First Nation
- XwAkwil First Nation

Is this correct?

☒ Yes, this information is correct

☐ No, this information is incorrect

Cancel Back Create Submission

8. If the information is incorrect, select **No, this information is incorrect** and click **Back** to return to the previous page
9. If you've selected a condition that already has a submission associated with it, you will see a message with options to:

- View the existing submission
- Go back and select a different condition

5.2 New Package Resubmission

How you create a new package depends on where your submission is in the review process. If the package is still in progress, or you have submitted it and the EAO has not yet completed its review, contact the EAO at . Once the EAO has completed its review of a package, you can create the new version yourself: open the submission package and select + New Submission.

NOTE: In the case of multiple packages, the package which is enforceable will always display a message and the shield icon.

5.3 Completing the Contact Information Form

The Contact Information is the person the EAO should contact if they have any question about this submission.

1. Click **Fill/Edit Form** next to Contact Information Form

Submission Contact Information

Provide the contact details for the person(s) we should reach out to if we have questions about this submission package. You can select from your saved contacts or add new contact information below.

Primary Contact

Add New Contact or Select Existing User
 Add New Contact ▼

Given Name

Surname

Company Name

Position/Role

Work Phone Number Ext.

Work Email Address

Secondary Contact

Add New Contact or Select Existing User
 Add New Contact ▼

Given Name

Surname

2. Select an existing user on the account from the dropdown to make them the contact. Their given name, surname, company name, position, phone number and email address fill in automatically.
3. Or enter the primary contact's information yourself:
 - Given name
 - Surname
 - Company name
 - Position/role
 - Work phone number
 - Work email address
4. Enter the secondary contact's information (same fields as primary contact)
5. Click **Save** to complete the form

NOTE: Contact information is editable at any time.

5.4 Adding Consultation Records

1. Click **Add/Edit Files** next to Consultation Record(s)
2. Under Consultation Records Information, review the list of parties identified as requiring consultation
3. If you consulted other parties that are not listed, add each one in the "Enter the name of other consulted party here" field

4. Answer the four consultation questions (see below), then add anything else the EAO should know in Notes/Comments
 - Were all parties listed above consulted/engaged on the development of this plan?
 - Was the plan provided to all parties listed above for review and comment during plan development?
 - Have written explanations been provided to each party listed above on how comments were fully and impartially considered and addressed in the plan?
 - For comments not addressed in this plan, have written explanations been provided to the commenters as to why the comments were not addressed?
5. Under Document(s) Upload, upload your consultation records, including the comment tracker, by:
 - Dragging and dropping files, or
 - Clicking to select files from your computer
6. Uploaded documents are listed underneath, with who uploaded each one and its version. Select **Remove** to take one out
7. Click **Save Completed Form** to complete this section, or **Save & Continue Later** to save your progress

NOTE: Make sure your comment trackers clearly show that consulted parties had the opportunity to respond to your responses to their comments.

5.5 Uploading Your Management Plan/IEM

1. Click **Add/Edit Files** next to Management Plan/IEM
2. Under Management Plan Requirements, answer "Does the plan address all the requirements in condition [number]?"
3. Answer "If the condition(s) associated with the plan references other documents, in whole or part (e.g., project application sections), does the plan address all requirements within the referenced document(s)?"
4. Under Information Verification, answer "The information on this form is correct to the best of your knowledge."
5. Add anything else the EAO should know in Notes/Comments
6. Under Document(s) Upload, upload your plan in Upload Management Plan/IEM Terms of Engagement
7. Upload anything else the EAO needs in Upload Supporting Documents (for example a table of proposed changes or a table of concordance)

NOTE: Your Management Plan/IEM document must be an unlocked PDF, that is, not password protected. Any proposed changes must be in tracked changes. Supporting documents may be in Word or Excel formats.

8. Click **Save Completed Form** to complete this section, or **Save & Continue Later** to save your progress

NOTE: Under the Account Terms and Conditions you accepted when your account was created, you are responsible for keeping personal information, as defined by the Freedom of Information and Protection of Privacy Act, out of the documents you submit.

5.6 Submitting to the EAO

NOTE: Only Regulated Party Account Administrators and Project Administrators can submit to the EAO.

1. Ensure all three sections (Contact Information Form, Consultation Records, and Management Plan/IEM) show a status of **Completed**
2. Click the **Submit to EAO** button

Save & Close Submit to EAO

3. You will see a success message confirming your submission

Your plan has been successfully submitted to the EAO. You will also receive an email to confirm your submission.

If you have any question, or need to add or replace documents in your submission, please contact the EAO at EAO.ManagementPlanSupport@gov.bc.ca.

4. You will receive a confirmation of receipt email, with the subject "Confirmation of receipt for [package name]"
5. The email lists your submission name, the submission date, and every document you submitted

NOTE: Once you submit, the Consultation Records and Management Plan/IEM sections lock and you cannot change them. They reopen only while the EAO has an update request open on your package. Contact Information stays editable at all times.

NOTE: Your submission is not considered received by the EAO until you receive the confirmation of receipt email.

6. Tracking Submission Status

6.1 Understanding Status Types

Your submission will progress through various statuses as it moves through the review process:

Status	What It Means
New	Submission has been created but not started
In Progress	Your package is being worked on. It stays In Progress until you submit. Individual sections still show their own progress.
Submitted	Submission has been sent to the EAO
Under Consultation Check	EAO is reviewing the consultation records
Passed Consultation Check	The EAO has completed its consultation check on your consultation records
Update Requested	EAO has requested additional information
Revision Required	EAO has determined revisions are needed
Under Review	EAO is reviewing the management plan
Updated	Submission has been Updated (after an Update or Revision Request from the EAO)
Review Not Completed	A new package was created before the EAO finished reviewing this one, so this review was not completed
Approved/Accepted/Satisfied/Reviewed	Management Plan/IEM has been approved by the EAO

To find submissions by status, use the Post-Decision Submission Status filter on the projects page. It lists New, In Progress, Submitted, Under Consultation Check, Passed Consultation Check, Update Requested, Revision Required, Updated, Under Review, and Review Completed.

6.2 Document Versioning

A version number has two parts. The first is the package version, the second is the document version inside that package:

- In the first package (package 1), the first version of a document is 1.1
- Replacing a document inside the same package increases the second part by 0.1: 1.2, then 1.3, and so on
- When a new package is created, the first part increases. The first document in package 2 is 2.1, then 2.2, and so on
- A blue **New Version** badge appears whenever a new version of a document is added

6.3 Finding Your Documents

The Documents page lists every document your organization has submitted, so you can find one without opening each submission package.

- Select **Documents** in the left-side navigation.
- Most accounts have only one project, and that project is already selected for you. If your account has more than one, choose the one you want in **Select a Project**. The table shows documents for that project only.
- Narrow the list with **Search Documents by Name, Work/Phase, Submission Type, Status**, and the two **Date Submitted** fields. **Clear Filters** resets them all.
- The table lists the submission name, work, phase, version, submission date and status, with a rows-per-page control underneath. Only the most recent version of a document appears in the row; select the control next to the version number to see earlier versions.
- Select a submission name to download the file.

NOTE: Only Regulated Party Account Administrators and Project Administrators can open the Documents page. Collaborators reach documents through the submission packages they have been given access to.

6.4 Emails from EPIC.submit

EPIC.submit sends you an email at the points below. These emails come from the EAO Digital Services Team and are not monitored, so contact your EAO contact for the project if you need to reply.

- **Confirmation of receipt for [package name]:** sent to you when you submit a Management Plan package. It lists the submission name, the submission date, and every document you submitted.

- **Action Required: Update Your Submission:** sent when the EAO asks you to update your submission, and when the EAO asks for a revision after a consultation check.
- **Invitation to resubmit a new version of [package name] in EPIC.submit:** sent to all Project Administrators when the EAO creates a new package for you to submit a revised Management Plan into.
- **Invitation to join EPIC.submit:** sent when someone adds you to the account. The wording describes the role you have been invited into.

7. Responding to EAO Requests

7.1 Handling Update Requests

When the EAO requests updates to your submission:

1. You will see an **Update Requested** badge on your submission
2. A collapsible section will appear with a message from the EAO explaining what updates are needed
3. The package will be unlocked, allowing you to edit documents
4. Make the requested changes by adding or replacing documents
5. You can add a note to the EAO explaining the changes you've made
6. A Regulated Party Account Administrator or Project Administrator must resubmit the package to the EAO

7.2 Handling Revision Requests

A **Revision Required** badge can appear in two situations. What you do next depends on which one applies.

After a Consultation Check

When the EAO needs changes to your consultation records, the revision stays on your current package:

1. You will see a **Revision Required** badge on your submission.
2. A collapsible section opens with a note from the EAO describing what needs to be updated.
3. The package is unlocked so you can add or replace the requested documents in place.
4. You can add a note to the EAO explaining the changes you have made.
5. A Regulated Party Account Administrator or Project Administrator resubmits the same package to the EAO.

After a Management Plan review

When the EAO's Management Plan decision requires a revision, a new package is created for the revised plan:

1. A new, blank package is automatically created
2. You will see a **Revision Required** badge on your submission, and the new package opens with a banner stating that a revision is required
3. You will need to complete every section from scratch and resubmit all documents, including consultation records
4. The contact information will be pre-filled, but you must confirm it
5. Make the requested revisions
6. A Regulated Party Account Administrator or Project Administrator must submit the new package to the EAO
7. When the EAO records this decision, it can mark the current version as enforceable while it waits for your revision. If it does, that version stays enforceable, shown with the shield icon, until you submit the new package and the EAO reviews it successfully.

8. Troubleshooting

8.1 Common Issues and Solutions

First-time login: Incorrect Project Information

Problem: The project information displayed is incorrect.

Solution:

1. Click **No, this is incorrect** on the project confirmation page
2. Contact the EAO at eao.managementplansupport@gov.bc.ca to have the information corrected

Unable to Submit to EAO

Problem: The Submit to EAO button is not working or is grayed out.

Solution:

- Ensure all sections of the submission show a status of **Completed**
- If you are a Collaborator, you cannot submit to the EAO; contact a Regulated Party Account Administrator or a Project Administrator to submit on your behalf

Need to Change Documents After Submission

Problem: You need to update documents after submitting to the EAO.

Solution:

- If the EAO has not yet completed its review, contact the EAO at eao.managementplansupport@gov.bc.ca to ask them to reopen your package. If the EAO sends you an update request, the package unlocks on its own and you can replace documents without contacting anyone. Once the EAO has completed its review, open the package and select + New Submission to submit a new version yourself.

Invitation Email Not Received

Problem: A user you invited has not received the invitation email.

Solution:

1. Go to the User Management page
2. Find the user in the table
3. Click the resend link to send the invitation again

Invitation Link Has Expired

Problem: The account set-up link you were sent no longer works.

Solution:

Account set-up links expire 7 days after the EAO generates them. Contact the EAO at eao.managementplansupport@gov.bc.ca and ask them to renew the link.

You Are Signed Out and See an Access Denied Page

Problem: You are signed out of EPIC.submit and see an Access Denied page.

Solution:

Your access has been revoked. Contact a Regulated Party Account Administrator or Project Administrator at your organization to have it reinstated.

8.2 Getting Help

For help with a Management Plan submission, contact the EAO at eao.managementplansupport@gov.bc.ca. For technical problems with EPIC.submit, contact eao.epicsystem@gov.bc.ca.

9. Glossary of Terms

Term	Definition
EAO	Environmental Assessment Office
Certificate/Exemption Holder (Holder)	An organization that has received an Environmental Assessment Certificate or Exemption Order and needs to submit management plans
Management Plan (MP)	A document required by the EAO that outlines how environmental impacts will be managed
Independent Environmental Monitor Terms of Engagement (IEM TOE)	A type of regulatory submission that governs the use of an IEM
Consultation Records	Documentation of consultation with required parties
Account Setup Link	A one-time use link sent via email for first-time access to EPIC.submit
BC Services Card	A government-issued identification card that can be used to access online government services
Business BCeID	A digital identity for businesses to access online government services
Regulated Party Account Administrator	A user with account-level access across every project in the organization's account; can create and submit, manage users across all projects, and assign the Regulated Party Account Administrator, Project Administrator, and Collaborator roles
Project Administrator	A user with access to all projects on the account, or to specific projects only; can create and submit, and manage users within those projects, but cannot assign the Regulated Party Account Administrator role
Collaborator	A user who can view and contribute to submissions, scoped to all submissions or to specific submissions; cannot submit to the EAO, manage users, or open the Documents page
Package	A submission and everything in it: the Contact Information, Consultation Records, and

	Management Plan/IEM sections, submitted to the EAO together
Section	One part of a package: Contact Information, Consultation Records, or Management Plan/IEM. Each has its own status
Condition	A requirement on your certificate or exemption order. You create a submission against a condition
Badge	The small coloured status label shown on a submission or a document
Enforceable version	The version of a plan the EAO has finalized for implementation. It shows a green banner and a shield icon
Update Request	A request from the EAO for more or replacement documents in a section. It unlocks the package so you can make the change and resubmit the same package
Revision Required	The result of a review that needs changes. After a consultation check it stays on the same package; after a Management Plan review a new package is created

10. Document Version History

Date	Version	Update Details
July 18, 2025	1.1	- New package resubmission - Contact information is editable - User Guide download on home page.
September 22, 2026	2.0	- Revision Required workflow updated (Consultation Check and Management Plan paths; banner for Management Plan revisions) - Management Plan In Progress package status - Regulated Party Account Administrator role added - Business BCeID name corrected - Three roles, with access-level options - Regulated Party Account Administrators can submit and resubmit - Holder can create a new package once a review is completed. Terms and Conditions step added - Joining an account by invitation - Revoking and reactivating users - Documents page - Emails from EPIC.submit - Passed Consultation Check and Review Not Completed statuses - Post-Decision Submission Status filter - Glossary expanded - Accepted file formats corrected - User Guide link location corrected - Support contacts split by purpose - Document version numbering explained as package version plus document version. - First-time login scoped to organizations without an account, with the new-project path for existing accounts - Contact selection from existing users - Documents page rewritten against the live screen (project selection, filter names, columns) - Consultation Records and Management Plan sections rewritten against the live forms, including the four consultation questions, the Management Plan Requirements and Information Verification answers, and the unlocked-PDF and tracked-changes requirement.
